Tadepalligudem, AP, India | +91 6301496899

PROFESSIONAL SUMMARY

Computer Science (AI & ML) undergraduate with hands-on experience building enterprise-grade full-stack and AI-powered applications. Delivered production frontend systems, real-time dashboards, and LLM/OCR-driven workflows across three internships. Proficient in React.js, Node.js/Express, Python, and MongoDB, with a strong focus on scalable architecture, clean code, and UI/UX precision.

TECHNICAL SKILLS

Languages: Python, JavaScript, C

Frontend: React.js, HTML5, CSS3, REST API Integration, Responsive Design

Backend & Security: Node.js, Express.js, FastAPI

Databases: SQL, MongoDB

AI & Data: LLMs (Gemini), OCR (Tesseract/EasyOCR), Machine Learning, Data Preprocessing

Tools: Git, GitHub, VS Code, Antigravity

PROFESSIONAL EXPERIENCE

Full Stack / Frontend Developer Intern

Jun 2026 – Jul 2026

Cerevyn Solutions Pvt Ltd | Remote

- Spearheaded frontend development for BioFactor Pulse, an enterprise agricultural field operations platform, building modular UI components with React.js.
- Engineered real-time dashboards, field CRM modules, and workforce tracking systems with live leaderboards and automated attendance workflows.
- Integrated backend REST APIs with client-side state and enforced Role-Based Access Control (RBAC), improving UI rendering efficiency.

Research Intern – Machine Learning

May 2025 – Jul 2025

National Institute of Technology (NIT), Tiruchirappalli | Tiruchirappalli, TN

- Researched core ML algorithms and predictive model architectures under faculty guidance; built end-to-end data preprocessing and validation pipelines in Python to improve model accuracy.

Software Developer Intern

Jun 2025 – Jul 2025

House of Companies | Remote

- Developed application modules using Java, HTML/CSS, and relational databases, contributing across the full SDLC.

KEY PROJECTS

BioFactor Pulse — React.js, REST APIs, RBAC

- Architected a multi-role platform for field activity tracking, farmer onboarding CRM, and real-time intern performance analytics with a live operations dashboard.

CivicFlow AI — React.js, Node.js/Express, MongoDB, Gemini LLM, Tesseract OCR, JWT

- Built an AI-powered, role-based civic complaint routing platform (Citizen / Department Admin / Super Admin) that ingests grievances with photo and geolocation evidence, auto-classifies them via LLM and OCR, and routes them to the correct municipal department.
- Implemented secure JWT authentication with brute-force protection (auto-lockout after 5 failed attempts) and tiered rate limiting across all API routes.
- Designed a Dockerized deployment (React/Nginx frontend, Express API, MongoDB) with a graceful fallback to a local mock classifier when LLM API keys are unavailable.

Insightful — React.js, Vite, Node.js/Express, Gemini AI, Pinecone, MongoDB Atlas

- Frontend Developer on a 5-member team building an AI-powered customer feedback analysis platform for a Generative AI Workshop, using Retrieval-Augmented Generation (RAG) to turn unstructured reviews into sentiment insights, emerging themes, and actionable items.
- Built modular React/Vite UI components to surface AI-generated outputs — sentiment breakdowns, semantic search results, and competitive feedback analysis — for Product Manager, Marketing, and Founder stakeholder views.

EDUCATION

B.Tech, Computer Science & Engineering (AI & ML)

2023 – 2027

Sasi Institute of Technology and Engineering | CGPA: 7.9/10.0 | Tadepalligudem, AP

Intermediate (12th) — Sasi Junior College | 94%

2021 – 2023

Class 10 — Saint Francis De Sales School | 99.667%

2021

CERTIFICATIONS

- Introduction to Internet of Things (Elite, 76%) — NPTEL / IIT Kharagpur
- Machine Learning with Python Developer (300 hrs) — freeCodeCamp
- Data Analytics Job Simulation — Deloitte / Forage

SOFT SKILLS

Team Collaboration & Communication | Problem Solving | Adaptability | Time Management | Attention to Detail
